The funeral of the late Ira Bartlett took place this afternoon and was attended by a large circle of acquaintances, who had known him for years and knew of his high character and integrity. WILLIAM HERRING.

Dated Tombstone, Dec 12, 1892.

Hughes Did It.

C. M. Bruce relates to the Prospector on a story told him by one of the Tammany braves whom he chanced to meet on a recent trip to Nevada. After breakfast a number of gentlemen adjourned to the smoking room of the sleeper to enjoy their Havanas. Mr. Bruce was there and after an exchange of good mornings, conversation about Cleveland's nomination came up. Finding that Mr. Bruce was from Arizona he asked him if he knew an editor down there by the name of L. C. Hughes, to which he answered in the affirmative. The gentleman related the following story: "I am," he said, "a loyal member of Tammany hall and went to the Chicago convention in Hill's interest. On the first and only ballot the poll had reached Arizona and we saw that unless the Arizona delegation and two members of New Mexico did not vote against Cleveland he was a winner, and we concentrated our forces on Hughes, who had a pocket full of proxies.

The confusion was so great just at that moment that the call of Arizona could not be heard. We tried to get at Hughes but every time a Hill delegate would approach him he would jump up on his seat and wave a flag and shout for Cleveland. He acted like a crazy man. He was the most valuable man on the floor just then, and down him, he broke us all up when he cast his votes for Cleveland." And he brushed the ashes from his cigar with his little finger as he thoughtfully said: "Who would have thought that the nomination rested upon an Arizona editor?"

L. C. Little, the general manager of the Anaconda Manufacturing Co., of Cook's Peak, N. M., has gone to the state of Washington to incorporate his company under the laws of that state. His company is going to manufacture silk goods from the Spanish dagger which grows in abundance all over the territory. He says that he will employ 1,200 men in the business and expects to make a big thing of it. He claims that the fibre of the dagger is exceedingly fine and if properly handled will make a superior quality of silk.

Just received Pennsylvania Buckwheat Flour for sale in quantities to suit, at Wolcott's.

A Yard of Pansies.

By special arrangement with the publishers we are enabled to make every one of our readers a present of one of these exquisite Oil Pictures 36 inches long, a companion to "A Yard of Roses." This exquisite picture, "A Yard of Pansies," was painted by the same noted artist who did the "Roses." It is the same size and is pronounced by art critics to be far superior to the "Roses." The reproduction is equal in every respect to the original, which cost \$300, and accompanying it are full directions for framing at home, at a cost of a few cents, thus forming a beautiful ornament for your parlor or a superb Christmas Gift, worth at least \$5. Send your name and address to the publisher, W. JENNINGS DEMOREST, 15 East 14th Street, New York, with three 2 cent stamps to pay for the packing, mailing, etc., and mention that you are a reader of the Prospector or Epitaph, and you will receive by return mail one of these valuable Works of Art.

People who have tried it say there is no better medicine for dyspepsia than Ayer's Sarsaparilla. It may not give one the stomach of an ostrich, but it so strengthens the alimentary organs that digestion of ordinary food becomes easy and natural.

Everybody knows that the conditions for health are not favorable when the stomach, liver and bowels are disordered. In such cases, headache, indigestion and constipation are the result; for all which ailments the proper remedy is Ayer's Cathartic Pills.

Ira Bartlett's Death.

Coroner Alvord returned late last night from the Chiricahua mountains, where he went to hold an inquest on the remains of Ira Bartlett, who shot himself on Saturday night last. The party had a tough time going up the canyon. Snow had fallen to a depth of four inches and the weather was bitter cold.

A jury was summoned and after hearing the testimony, found that deceased came to his death by a pistol shot wound inflicted with suicidal intent. The only witness examined was James Tompkins, in whose cabin the act was committed. He was out doors with three or four others, when they heard a pistol shot and went to the house, to find Bartlett on the bed with a 45 caliber Colt's revolver clamped tightly in both hands and a bullet hole through the back of his head. He was dead. The body was not disturbed but was found in the same position by the coroner. The hands were tightly grasped around the pistol that two fingers were broken in unclasping them. The bullet after going through the head struck the ceiling and dropped back into an empty cigar box in which Bartlett kept his tobacco. The body was brought to town and properly cared for by friends of deceased.

It appears from the evidence that Bartlett had been addicted to the use of opium. He also told Mr. Tompkins that he had some property in the state of Washington.

Consumption Cured.

An old physician, retired from practice, having had placed in his hands by an East India missionary the formula of a simple vegetable remedy for the speedy and permanent cure of Consumption, Bronchitis, Catarrh, Asthma and all Throat and Lung Affections, and a positive and radical cure for Nervous Debility and all Nervous Complaints, after having tested its wonderful curative powers in thousands of cases, has felt it his duty to make it known to his suffering fellow-men. Actuated by this motive and a desire to relieve human suffering, I will send free of charge to all who desire it, this recipe, in German, French or English, with full directions for preparing and using. Sent by mail by addressing with stamp naming this paper, W. A. NOYES, 520 Power's Block, Rochester, N. Y.

ALL SORTS AND CONDITIONS.

In some part or other of the world, horses, cattle and sheep are found wild, but nowhere can be found wild camels.

The largest shipment of apples ever made from the United States left Portland recently for England. The cargo consisted of 13,000 barrels.

The new regulations of the Suez canal have necessitated the building of vessels for carrying oil in bulk. A syndicate has been formed for this purpose and the type of steamer differs materially from anything thus far afloat.

MR. FORD H. ROGERS, of Detroit, is the possessor of a blotter, journal and ledger of the American Fur Company, John Jacob Astor & Son, proprietors, covering the business of the northern department from 1817 to 1835. The books record transactions of millions of fur.

FANCIES FOR THE FAIR SEX.

ENAMEL flower-pins are among the most beautiful of the current trifles in jewelry.

The Ladies' Cycling club of New York has adopted as its uniform a tailor-made dress of navy-blue serge, scarlet skirt and yachting cap.

MANY Polish women living in New York are adopting the custom of their countrywomen by wearing black throughout the year 1892, which marks a century of Poland's bondage.

LITTLE brocade and plush bags lined with flannel are shown at bazars to protect umbrella and parasol handles. As these grow in delicacy and costliness, it is perhaps well to have cases for them.

New hairpins, which are thrust in the back of the coiffure to hold in place the small bonnets and crownless hats, are of gold, beautifully cut out in open-work pattern. They have almost superseded the knots and twists so long in vogue. "It is so easy," said the exclusives, "to imitate them in cheap quality."

CENTRAL AMERICA.

The Old Civilization and the Newest on the Western Hemisphere to be Illustrated.

Central America, the seat of the oldest and newest civilizations in the western hemisphere, is to be well represented by exhibits of its glory that is past and its prosperity that is at the world's fair. Lieut. Scrivan, the special commissioner to the Central American states, has made an informal report on his work and the outlook, which he pronounces very encouraging indeed.

His final report will not be presented for some weeks. Lieut. Scrivan says in reference to the progress made in exposition matters by the four countries in Central America that the prospect for an interesting and excellent display from them is most encouraging; each now seems to understand the value to it of the opportunity afforded by the World's Columbian exposition at Chicago. At Jamaica much interest was manifested in exposition affairs, and at Turk's island the same feeling was manifest. The people all seem anxious for recognition at Chicago.

At Bermuda a commission has been appointed and a small appropriation secured. The Bermuda commission will deal directly with the director general and the authorities of the exposition at Chicago, and not through the English colonial office. The people of Bermuda are particularly desirous that their exhibit should not be placed with that of the West India islands, the preference of the commission being for space near or adjoining that allotted to Canada. Strong efforts are being made to dispel the impression that Bermuda is a West India island. Though small, Bermuda is of considerable importance to the United States commercially, and its merchants are anxious to make a creditable display, and a considerable increase of the appropriation, which is now three thousand dollars, will be granted.

A Cholera Scare.

A reported outbreak of cholera at Helmetta, N. J., created much excitement in that vicinity. Investigation showed that the disease was not cholera but a violent dysentery, which is almost as severe and dangerous as cholera. It is certainly one of the best things ever made. For sale by H. J. PETO.

A Novel Timepiece.

Mr. J. C. Hoefler (Pa.) watch and clock maker has completed a novel clock for exhibition at the world's fair in Chicago. The oil cups at the journals are so small that nothing larger than a hair can be inserted. There is a headlight and bell, flag holders on the pilot, whistle and everything usually connected with a locomotive. It has a link motion under the engine to reverse it. The weight of the locomotive is one and a quarter pounds.
